
OFARC Monthly Meeting Minutes 2026_0725

The meeting took place at the American Red Cross building and was kicked off by Mark at 9:20 am, 14 people were in attendance. Six people came for license testing.

Roger (K0KON) shared his learnings about hooking up computers with transceivers, common mistakes and how to trouble-shoot problems. His presentation can be found here:

[Computer2Transceiver interfacing.pdf](#)

Dave shared his journey to achieve the DXCC award over a period of decades operating on 6m and some the magic he's experienced on this band. His presentation can be found here: [Anatomy of a SIX meter DXCC v2.pdf](#)

Candice was in attendance with a premium go box outfitted with a pair of radios to cover HF (FT891), VHF and UHF frequency bands. Also in the kit was an AlexLoop (magnetic) antenna (https://www.passion-radio.com/long-wire/alex-loop-2635.html?srltid=AfmBOorlItco6J60eqHlrOc1d_HD7f_niUIkJWqPDqSJqLgnnsgk38Pj). She was looking for help to get everything working. Ultimately, cable connectors seemed to be the root-cause of her problems. I believe MarkL made arrangements to help her resolve the problem.
